

## Home Care Packages (HCP)

### What is ADEC?

Specialists in supporting people from ethnic backgrounds. Empowering people living with a disability, our aging population and their families and carers.

### What is HCP?

This is a government funded home care package designed for those with more complex care needs. The program aims to provide a coordinated and tailored service to help people over 65 years to continue living independently and happily at home.

There are four levels of Home Care Packages, each level providing a different subsidy amount dependent on the level of your care needs.

### What does HCP offer?

- You get your own funds to spend and you can decide which services to spend the funds on, based on your assessed care needs (you are not restricted to a set menu of services)
- A Care Manager helps you understand the system and works with you to create a Care Plan that suits your individual needs and preferences
- Once you have a package, it stays with you long term
- Your eligibility is assessed by the Aged Care Assessment Team (ACAT)
